TEXTALIGN Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > T Command > TEXTALIGN

Function Description:

This command is used to align texts. The alignment method is simple and practical. Multiple text can be aligned along the X, Y axis or along the specified line. Because this function is only valid for text objects, even if the user mistakenly selects other non text objects into the selection set when selecting the operation object, the program will automatically filter them.

Command Access:

Menu: Text > Text Align

Ribbon: Annotation > Text > Text Align

Toolbar: /

Command: TEXTALIGN

Alias: /

Command Prompts:

Please select object:

Select the align method[X axis(X)/Y axis(Y)/Two points(P)]<X axis>:
