TIFOUT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > T Command > TIFOUT

Function Description:

This command is used to save the selected object in TIFF file format.

In the Create Raster File dialog box, users can enter a file name to create a TIF format file. This file contains all selected objects and reflects the content that displayed on the screen.

Note: When the FILEDIA system variable is set to 0, command prompts are displayed.
