RENAME Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > R Command > RENAME

Function Description:

This command is used to change the names assigned to items such as layers or dimension styles. Users can rename object types, such as layers, dimension styles, table styles, text styles and so on. It is strongly recommended to create naming rules for types and save them in drawing template files. The [Rename dialog box](#) is displayed. If you enter -RENAME at the Command prompt, options are displayed.

Command Access:

Menu: Format > Rename...

Ribbon: /

Toolbar: /

Command: RENAME

Alias: REN

Command Prompts: /
