

TEXTED System Variable — GstarCAD 2027

TEXTED System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > T System Variables > TEXTED

Function Description:

The TEXTED system variable is used to specify the display of user interface when creating and editing single texts.

Type	Integer
Saved in	Registry
Initial value	2
Range	0,1,2

Those settings can be applied on single texts created by TEXT command.

System Variable Value:

- 0:** display in-place editor when creating or editing single texts
- 1:** accept texts in command line when creating single texts. Display in-place editor dialog box when editing sing texts.
- 2:** the same as 0, the difference is that it auto repeats text entering.
