MATCHPROP Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > M Command > MATCHPROP

Function Description:

This command is used to apply the properties of a selected object to other objects. The main properties contain color, layer, linetype, linetype scale, lineweight, plot style, transparency, and other specified properties.

Command Access:

Menu: Modify > Match Properties

Ribbon: Home > Properties > Match Properties

Toolbar: Standard > Match Properties

Command: MATCHPROP

Alias: MA

Command Prompts:

Select source object:

Select Target object or [Setup(S)]:

Target object

Specifies the objects to which you want to copy the properties of the source object.

Setup

Displays the Property Settings dialog box, in which you can control which object properties to copy to the target objects. By default, all object properties are selected for copying.
