MSPACE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > M Command > MSPACE

Function Description:

This command is used to switch from paper space to model space in a layout viewport.

This command can be used in paper space and model space. Users can draw, design, and create 2D drawings and 3D model in model space. They can create a layout for plotting in paper space.

In a layout, users can make the last viewport to be the current by entering MSPACE at the Command prompt, and then work in model space. They can also switch to model space by double-clicking the viewport.

Command Access:

Icon: /

Menu: /

Ribbon: /

Toolbar: /

Command: MSPACE

Alias: MS

Command Prompts: /
