Multileader Style Manager Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > M Command > MLEADERSTYLE > Multileader Style Manager Dialog Box

Function Description:

These styles specify formatting for landing lines, leader lines, arrowheads and content. You can create, modify, and delete these styles.

Dialog Box Options:

Current multileader style

Displays the name of the style you create. The default style is Standard.

Styles

Displays a list of styles. The current style is highlighted.

List

Controls the contents of the Styles list. Click All styles to display all available styles in the drawing. Click Styles in use to display only the styles that are referenced in the current drawing.

Preview of

Displays a preview image of the style that is selected in the Styles list.

Set current

Sets the style selected in the Styles list as the current style. All new multileaders are created using this style.

New

Displays the Create New Multileader Style dialog box, in which you can define new styles.

Modify

Displays the Modify Multileader Style dialog box, in which you can modify styles.

Delete

Deletes the style selected in the Styles list. A style that is being used in the drawing can not be deleted.
