

LAYLOCKFADECTL System Variable — GstarCAD 2027

LAYLOCKFADECTL System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > L System Variables > LAYLOCKFADECTL

Function Description:

The LAYLOCKFADECTL system variable is used to control the amount of fading for objects on locked layers.

Type	Integer
Saved in	Registry
Initial value	50
Range	-90 ~ 90

System Variable Value:

- 0:** locked layers are not faded
 - >0:** when the value is positive, control the percentage of fading up to 90%
 - <0:** when the value is negative, locked layers are not faded, but the value is saved for switching to that value by changing the sign
- Note:** the fading value is limited to 90 percent to avoid confusion with layers that turned off or frozen.
