PSETUPIN Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > P Command > PSETUPIN

Function Description:

This command is used to import a user-defined page setup into a new drawing layout. Users can select the drawing (.dwg), template (.dwt) or drawing interchange format (.dxf) file from the Select Page Setup From File dialog box.

After selecting the file, the Import Page Setups dialog box is displayed. If the FILEDIA system variable is set to 0 and entering -PSETUPIN at the command prompt, the command prompts are displayed.

Command Access:
