PUBLISH Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > P Command > PUBLISH

Function Description:

This command is used to publish drawings to DWF files, DWFx files, PDF files or to printers or plotters.

Users can combine drawing sets, create drawings or electronic drawing sets. The electronic drawing sets can be saved as DWF files, DWFx files and PDF files.

Users can view or plot the DWF and DWFx files, as well use a PDF viewer to view PDF files.

If you enter -PUBLISH at the command prompt, the Load sheet list dialog box is displayed, in which users can select and open an existing Drawing Sets

Description (DSD), and then the [Publish dialog box](#) displays all saved and to be published drawing sets in DSD files.

When the FILEDIA system variable is set to 0 and entering -PUBLISH at the command prompt, options are displayed.

Command Access:
