PURGE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > P Command > PURGE

Function Description:

This command is used to remove unused items from drawings, such as block definitions, dimension styles, groups, layers, linetypes and text styles. Zero-length geometry and empty text objects

can also be removed. The [Purge dialog box](#) is displayed.

If you enter -PURGE at the Command prompt, options are displayed.

Note: The PURGE command can not remove unnamed objects from blocks or locked layers (zero-length geometry and empty text objects).

Command Access:

Menu: File > Drawing Utilities > Purge...

Ribbon: /

Toolbar: /

Command: PURGE

Alias: PU

Command Prompts: /
