LAYERSTATE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > L Command > LAYERSTATE

Function Description:

This command is used to save, edit, restore and manage the layer states. The [Layer States Manager dialog box](#) is displayed.

Users can save the current layer settings in a drawing as a layer state. Layer states can then be restored, edited, imported and exported for use in other drawings.

Command Access:

Menu: Format > Layer States Manager...

Ribbon: Home > Layer > Layer States Manager

Toolbar: Layer > Layer States Manager

Command: LAYERSTATE

Alias: /

Command Prompts: /
