LAYULK Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > L Command > LAYULK

Function Description:

This command is used to unlock the layer of a selected object. When you move the cursor over objects on locked layers, the locked icon is displayed. You can select an object on a locked layer and unlock that layer without specifying the name of the layer. Objects on unlocked layers can be selected and modified.

Command Access:

Menu: Format > Layer Tools > Layer Unlock

Ribbon: Home > Layer > LAYULK

Toolbar: Layers II > Layer Unlock

Command: LAYULK

Alias: /

Command Prompts:

Select an object on the layer to be unlocked:
