Lineweight Settings Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > L Command > LWEIGHT > Lineweight Settings Dialog Box

Function Description:

Sets the current lineweight, display options, and lineweight units.

Dialog Box Options:

Lineweight

Displays a list of lineweights that you can select.

Current Lineweight

Displays the current lineweight in the drawing.

Units for Listing

Specifies whether lineweights are displayed in millimeters or inches.

- Millimeters (mm): Specifies lineweight values in millimeters.
- Inches (in): Specifies lineweight values in inches.

Display Lineweight

Controls whether to display lineweights in the current drawing.

Default

Controls the default lineweight for layers.

Adjust Display Scale

Controls lineweight scaling on the Model tab. This setting has no effect on layouts.
