RIBBONDOCKEDHEIGHT System Variable

[GstarCAD 2027](#) · [System Variables](#)

Function Description:

The RIBBONDOCKEDHEIGHT system variable is used to determine whether set the horizontal docked ribbon to be current tab height or predefined height.

Type	Integer
Saved in	Registry
Initial value	100
Range	0 ~ 500

If specified to be 0, ribbon will adjust and fit selected tab height. Set a value between 1 and 500, ribbon height will be the number of this value in pixels.
