ALIGNTOOL Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > A Command > ALIGNTOOL

Function Description:

This command is used to allow to align selected objects such as: rectangles, circles, lines, splines, arcs, plines, blocks and even 3D model objects along the X or Y axis coordinates, avoiding to perform the Select and Move commands. This tool has different alignment methods, including an offset option for each axis and can be combined as well.

Command Access:

Menu: Modify > Align

Ribbon: Home > Modify > ALIGNTOOL

Toolbar: /

Command: ALIGNTOOL

Alias: /

Command Prompts:

Please select the object to
align:
