ARRAYCLASSIC Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > A Command > ARRAYCLASSIC

Function Description:

This command is used to create copies of array objects in 2D or 3D space. The [Array dialog box](#) is displayed.

Command Access:

Menu: Modify > Array > Classic Array
Ribbon: Home > Modify > Classic Array
Toolbar: Array > Classic Array
Command: ARRAYCLASSIC
Alias: /

Command Prompts: /

Rectangular Array

Enter items: rows, columns, offset and direction.

Polar Array

Enter items: center point coordinate or select center point, Method, and values. Users can also check whether select "Rotate items as copied". User can use the DELOBJ system variable to control whether to save or delete the original object. Entering “-array” under the command prompt, it will display options.
