Edit Attribute Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > A Command > ATTEDIT > Edit Attribute Dialog Box

Function Description:

The Edit Attribute Dialog Box is used to change attribute information in a block. Users can use -ATTEDIT to change some properties of attributes, such as its position, height and style.

Dialog Box Options:

Block Name

Specifies the name of the selected block. All attributes contained in the block will be displayed in this dialog box.

****Attributes**** List

Displays the first eight attributes. Users can edit the attribute values. If there are other attributes in the block, users can click "Previous" or "Next" to browse attribute list. The locked attribute can not be edited.

Previous

Displays the previous eight attributes. The "Previous" button is available only on condition that there are more than eight attributes contained in the selected block and need to display other attributes by clicking the "Next" button.

Next

Displays the next eight attributes. If there is no other attributes contained in the selected block, the "Next" button will be not available.
