Edit System Variable List Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > S Command > SYSVARMONITOR > Edit System Variable List Dialog Box

Function Description:

Manages the list
of monitored system variables.

Dialog Box Options:

The list of dialog options is as follows:

Available system variables

Lists the system variables that are not monitored. Note: Read-only system variables are not included in this list.

Monitored system variables

Lists the system variables that are monitored.

Search List

In the search box, types a specified string to quickly find a system variable.

Adds the selected available system variables into the monitored system variable list.

Removes the selected monitored system variables from the monitored system variable list.

Clicks to enter the corresponding system variable help page.

OK

Closes the Edit System Variable List dialog box and applies all system variable changes.

Cancel

Closes the Edit System Variable List dialog box without applying any system variable changes.

Help

Clicks to enter the help page of the corresponding "Edit System Variable List" dialog box.
