SECTIONPLANEJOG Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > S Command > SECTIONPLANEJOG

Function Description:

This command is used to add a jogged segment to a section object. You can insert a jog, or angle, into a section object as you create it. The jog is created on the section line. The jogged segment is created at a 90-degree angle to the section line.

Command Access:

Menu: /

Ribbon: 3D > Section > Add Jog

Toolbar: /

Command: SECTIONPLANEJOG

Alias: /

Command Prompts:

Select section object:

Specify a point on the section line to add jog:
