SHAPE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > S Command > SHAPE

Function Description:

This command is used to insert a shape from a shape file that has been loaded using LOAD.

Command Access:

Icon: /
Menu: /
Ribbon: /
Toolbar: /
Command: SHAPE
Alias: /

Command Prompts:

Enter shape name or [?]:

Shape name

Loads shapes. If the shape belongs to an external reference that attached to the current drawing as a block, it is labeled as externally dependent. Users can use it by reloading.

?

Lists shapes or shape definition files. If you enter an asterisk (*) under the command prompt, the program lists shape names.
