BLOCK Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > B Command > BLOCK

Function Description:

This command is used to create a block definition for the specified object. The [Block Definition dialog box](#) is displayed. You can create a block definition by selecting objects, specifying an insertion point and giving it a name.

Command Access:

Menu: Draw > Block > Make

Ribbon: Home > Block > Make

Toolbar: Draw > Make Block

Command: BLOCK

Alias: B

Command Prompts:

/
