BLOCKTOXREF Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > B Command > BLOCKTOXREF

Function Description:

This command is used to replace all instances of a specified block with an xref. BLOCKTOXREF searches the entire drawing for references to a specified block name and replaces them with an xref that you specify. You can use this tool to unbind an xref, replacing the block with the original referenced drawing. Afterwards, you can use the PURGE command to remove the unreferenced block definition from the drawing.

Command Access:

Menu: Express > Blocks > Convert Block to Xref

Ribbon: /

Toolbar: /

Command: BLOCKTOXREF

Alias: /

Command Prompts: /

Operation Steps:

1. In BLOCKTOXREF dialog box. Select a block to replace: M10. Then select "OK".

2. In Select an Xref file dialog box. Select the Xref you want. Then select "Open".

3. The command line will prompt as shown below.
