BreakObject Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > B Command > BREAKOBJECT > BreakObject Dialog Box

Function Description:

The dialog box provides four breaking modes with gap distance to visualize the differences between breaking options

Dialog Box Options:

Gap

Indicates the gap value between broken objects.

Break all objects selected with each other

This option breaks all intersected objects each other. You can select objects by window selection or picking each object.

Break selected objects with other selected objects

This option breaks all intersected objects by two selection sets (A and B). The objects selected under the first set (A) will be broken meanwhile the objects selected under the second set (B) will be not broken.

Break objects touching selected objects

This option breaks all intersected objects that touch at first instance selected object.

Break selected objects with any objects that touch it

This option breaks the first instance selected object with all intersected objects to it.
