CIRCLE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > CIRCLE

Function Description:

This command is used to create a circle.

Command Access:

Menu: Draw > Circle > ...

Ribbon: Home >

Draw > Circle > ...

Toolbar:

Draw > Circle

Command: CIRCLE

Alias: C

Command Prompts:

Specify center point for circle or [3P/2P/Ttr/Arc/Multiple/Concentric]:

Center point

Create a circle by specifying its center point and diameter (or radius).

- **Radius:**

Define circle radius by inputting value or specifying a point.

- **Diameter:**

Define circle diameter by inputting value or specifying the second point.

3P

Create a circle by specifying 3 points on it.

2P

Create a circle by 2 endpoints of its diameter.

Ttr

Create a circle by specified diameter and two tangent objects.

Arc

Create a circle by an existing arc.

Multiple

Create more than one circle.

Concentric

Create more than one concentric circle.
