COPYCLIP Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > COPYCLIP

Function Description:

This command is used to copy the specified object to the Clipboard. Contents on Clipboard can be pasted into a document or drawing. When you copy objects to the clipboard, the information is stored in all available formats. When you paste them into a drawing, the format that retains the most information is used. Users can also convert objects by using command COPYCLIP and PASTECLIP.

Note:

If the cursor locates in the drawing area, it will copy the specified object to the clipboard; if the cursor locates in the command line or text window, it will copy the specified text to the clipboard.

Command Access:

Menu: Edit > Copy

Ribbon: Home > Clipboard > Copy Clip

Toolbar: Standard > Copy

Command: COPYCLIP

Alias: /

Shortcut: CTRL+C; Right-click on the drawing area, click "Clipboard" option, and then select "Copy" option.

Command Prompts:

Select object:
