CUIEXPORT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > CUIEXPORT

Function Description:

This command is used to export customized settings from the main CUIx file to an enterprise or partial CUIx files. Opens the “Transfer” Tab in the Customize User Interface dialog box, the main CUIx files (gcad.cuix) display in the left panel. Users can drag one item from one CUIx file to the other. Clicks the “Apply” button to save the changes and views the updated CUIx file.

Command Access:
