CompareDwg Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > CMP > CompareDwg Dialog Box

Function Description:

Once the command is started, the following window will be displayed.

In this dialog box, you have to browse the old DWG (original drawing) and the new DWG (drawing modified). You can also assign a path to save the compared drawing. Then select the button Option to set up the comparison parameters.

After setting up the comparison parameters such as: colors, layers, line type, etc. select Ok to confirm these parameters.

Note: Pay attention to the mark color because the deleted, modified and added objects will assume these into the compared drawing. Then select the button Compare in the window below to compare both drawings.

See the result:
