Load/Unload User Defined Settings Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > CUILOAD > Load/Unload User Defined Settings Dialog Box

Function Description:

Controls the display of customization groups and interface elements.

Dialog Box Options:

Loaded user defined group

Lists the currently loaded customization files.

File Name

Specifies the file to load when you choose Load. You can either enter the file name or choose Browse to display the Select Customization Files dialog box.

Unload

Unloads the customization group selected in the User Defined Group list.

Load

Loads the file specified under File Name.

Browse

Displays the Select Customization Files dialog box,

in which you can select a menu file to load.
