Object Grouping Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > C Command > CLASSICGROUP > Object Grouping Dialog Box

Function Description:

Displays, identifies, names, and changes object groups.

Dialog Box Options

Group Name

Displays the names of the existing groups.

Selectable

Specifies whether a group is selectable. When a group is selectable, selecting one object in the group selects the whole group. When the PICKSTYLE system variable is set to 0, no groups are selectable.

Group Identification

Displays the name and description of the group selected in the Group Name list.

- Group Name: Specifies the group name.
- Description: Displays the description of the selected group, if there is one.
- Find Name: Displays the "Group Member List" dialog box, showing the groups to which the object belongs.
- Highlight: Shows the members of the selected group in the drawing area.
- Included Unnamed: Specifies whether unnamed groups are listed. When this option is cleared, only named groups are displayed.

Create Group

Specifies properties of new groups.

- New: Creates a new group from the selected objects, using the name and description under Group Name and Description.
- Selectable: Specifies that a new group is selectable.
- Unnamed: Indicates that a new group is unnamed. A default name, *An, is assigned to unnamed groups. The n represents a number that increases with each new group.

Change Group

Modifies existing groups.

- Remove: Removes objects from the selected group.
- Add: Adds objects to the selected group.
- Rename: Renames the selected group to the name entered in Group Name under Group Identification.
- Re-Order: Displays the "Order Group" dialog box, in which users can change the numerical order of objects within the selected group. Objects are numbered in the order in which users select them for inclusion in the group.
- Description: Updates the selected group's description to the name that you enter in Description.
- Explode: Deletes the definition of the selected group. The group's objects remain in the drawing.
- Selectable: Specifies whether the group is selectable.
