

SELECTIONEFFECT System Variable — GstarCAD 2027

SELECTIONEFFECT System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > S System Variables > SELECTIONEFFECT

Function Description:

This SELECTIONEFFECT system variable is used to control the highlight display style of objects when they are selected (under the condition that hardware acceleration is enabled). When the value is set to 1, it displays a highlight effect compatible with AutoCAD; when the value is set to 0, it displays the original highlight effect.

Type	Integer
Saved in	Registry
Initial value	1
Range	0,1

System Variable Value:

- 0:** Dashed lines.
- 1:** Blue highlight lines.

Display Effect with Value 1:

Display Effect with Value 0 (Dashed Lines Indicating Highlight):
