## SELECTIONPREVIEW System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > S System Variables > SELECTIONPREVIEW

### Function Description:

The SELECTIONPREVIEW system variable is used to control the display of selection preview.

|               |          |
|---------------|----------|
| Type          | Bitcode  |
| Saved in      | Registry |
| Initial value | 3        |
| Range         | 0,1,2    |

The object will be highlighted when pickbox cursor rolling over objects. It means this object can be selected by clicking.

### System Variable Value:

- 0:** turn off
  - 1:** turn on when there is no active command
  - 2:** turn on when prompts to select objects
- Note:** when the COMMANDPREVIEW is on, it ignores the SELECTIONPREVIEW system variable.
