SELECTSIMILARMODE System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > S System Variables > SELECTSIMILARMODE

Function Description:

The SELECTSIMILARMODE system variable is used to control which property must be matched when using SELECTSIMILAR command to select objects with the same type.

Type	Bitcode
Saved in	Use-settings
Initial value	130
Range	0 ~ 255

It may be seemed as the similar object when objects with the same type locating on the same layer; for external reference, objects with the same name will be treated as similar objects.

System Variable Value:

- 0:object type
- 1: color
- 2: layer
- 4: linetype
- 8: linetype scale
- 16: lineweight

32:plot style

64:object style, including text style, dimension style, and table style

128:name, for reference objects(including blocks, xrefs, and images)
