

# SORTENTS System Variable — GstarCAD 2027

## SORTENTS System Variable

[GstarCAD 2027](#) · [System Variables](#)

System Variables > S System Variables > SORTENTS

### Function Description:

The SORTENTS system variable is used to control object sorting to support drawing order for several operations.

|               |                    |
|---------------|--------------------|
| Type          | Integer            |
| Saved in      | Drawing            |
| Initial value | 127                |
| Range         | 0,1,2,4,8,16,32,64 |

The setting is stored as a bitcode using the sum of listed system variable values.

### System Variable Value:

- 0:** close all object sorting
- 1:** sort for selected objects
- 2:** sort for object snaps
- 4:**disabled
- 8:**disabled
- 16:** sort by REGEN command
- 32:**sort for plotting

64: disabled
