DGNIMPORT Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > D Command > DGNIMPORT

Function Description:

This command is used to import the data from a DGN file into a new DWG file or the current DWG file, depending on the DGNIMPORTMODE system variable. The Import File dialog box is displayed. Once you select a DGN file to import, the [Import DGN Settings dialog box](#) is displayed.
