DIMDISASSOCIATE Command

[GstarCAD 2027](#) · [Command Reference](#)

Commands > D Command > DIMDISASSOCIATE

Function Description:

This command is used to remove associativity from selected dimensions. This command filters the selection set to include only associative dimensions on unlocked layers and in current space (for example, if model space is active, associative dimensions in paper space are excluded), and then it removes associativity of all dimensions and reports the number of dimensions that are filtered out and the number that are disassociated.

Command Access:
