DWG Convert Dialog Box

[GstarCAD 2027](#) · [Command Reference](#)

Commands > D Command > DWGCONVERT > DWG Convert Dialog Box

Function Description:

Changes drawings from one GstarCAD drawing type to another.
Displays a list of drawing files that you want to convert. All files to be converted are indicated by a check mark next to the file name. Right-click in the file display area to display a shortcut menu with several options.

Dialog Box Options:

Files tree tab

Displays a list of drawing files selected for conversion. Includes the drawing name and path, current format and conversion status. You can add drawing files by clicking the Add button or by dragging a file. You can sort the order of the drawings by clicking a column heading.

Files table tab

Displays the list of drawing files to be converted in a table format. By default, all files associated with the drawing (such as related external references) are listed.

Add File button

Opens the Select File dialog box, in which you can select drawing files to add to the conversion list. This button is available on both the Files Tree tab and the Files Table tab.

New List button

Clears the list of all drawings so you can select a new list of drawings for conversion. If the list has changed, you are prompted to save the current list.

Open List button

Opens the Open Conversion List dialog box, in which you can select a batch convert list file and then click Open to open the file.

Append List button

Opens the Append Batch Control List dialog box, in which you can select a batch convert list file to append to an existing list of drawings in the conversion list.

Save List button

Opens the Save Conversion List dialog box, in which you can select a batch convert list file or enter a new file name.

Select a conversion setup

Lists previously saved conversion setups. The default conversion setup is named Standard. Click to select a different conversion setup, if multiple setups are present. To create a new conversion setup or to modify an existing one in the list, click Conversion Setups. Right-click to display a shortcut menu with several options.

Setup description

If a conversion setup has been given a description when it was created or when modified, the description will appear in the Setup Description field. Click the Conversion Setups button to access the Conversion Setup dialog box.

Preview

Displays a thumbnail image of a drawing that is currently shown in the list of drawings to convert.
