Draw Rectangles and Polygons

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Create and Modify Objects > Draw Geometric Objects > Draw Linear Objects > Draw Rectangles and Polygons

Use RECTANGLE to create rectangular shape polylines. You can specify the length, width, area, dimensions and rotations.

Use POLYGON to create closed polylines with 3-1,024 equal-length sides, you can create equilateral triangles, squares, pentagons hexagons, and so on.

Draw a rectangle

1.Do one of the followings:

- Select Draw > Rectangle on the main menu.
- Click the Rectangle tool on the Draw toolbar.
- Type rectangle or rec and press Enter.

2.Identify one corner of the rectangle or enter an option.

Specify first corner point or
[Chamfer/Elevation/Fillet/Thickness/Width/Oblique]:

3. Identify the opposite corner of the rectangle or enter an option.

Specify other corner point or [Area/Dimensions/Rotation]:

Draw a polygon

You can draw a polygon by specifying the edge, Inscribing in circle or Circumscribing about circle.
