Modify Multilines

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Create and Modify Objects > Change Existing Objects > Modify Objects > Modify Multilines

Multilines is a kind of special object. You can modify it by MLEDIT command, but cannot modify it by FILLET, CHAMFER and some other functions.

Edit Multiline Styles

To change the properties , end caps and the background fill of subsequently created multilines, you can edit multiline styles using the command MLSTYLE.
