Overview of Linetypes

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Create and Modify Objects > Control the Properties of Objects > Work with Linetypes > Overview of Linetypes

A line or a curve in a drawing can consist of repeating patterns of dashes, dots and blank spaces, which is called the linetype.

Objects can have their individual linetypes or bylayer or independent of layers assigned individually.

You can set its scale to control the size of the dashes and spaces, and you can custom your own linetypes.
