Set the Current Color

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Create and Modify Objects > Control the Properties of Objects > Work with Colors > Set the Current Color

You can visually distinguish objects by using colors, either by assigning a color to an object by layer or independently of layer .

If you assign a color by layer, it will help you to distinguish the layers in your drawing. You can also use different colors for different objects on the same layer.

Dialog Box Options

Index Color

GstarCAD uses Index colors as a standard. Only the first seven colors have a standard color name: 1 Red, 2 Yellow, 3 Green, 4 Cyan, 5 Blue, 6 Magenta, 7 White/Black.

True Color

True colors cover over 16 million colors by 24-bit color definitions and use the RGB or HSL color model.

Color Books

There are a few Pantone color books available in this program. You can import other colors like the DIC color guide or RAL color sets. You can also import user-defined color books.
