Convert BLOCK to XREF

[GstarCAD 2027](#) · [User Guide](#)

User Guide > Express tool > Blocks > Convert Block to Xref

The BLOCKTOXREF command is used to replace all instances of a standard block with an xref. Unbind xrefs that are bound.

BLOCKTOXREF searches the entire drawing for references to a specified block name and replaces them with an xref that you specify. You can have the unreferenced block purged when done.
