DCVERTICAL Command

[GstarCAD 2027](#) · [Whats New](#)

Function Description:

Constrains the Y distance between points on an object, or between two points on different objects.

Command Access:

Icon:

Menu Item: Parametric(P) > Dimensional Constrains(D) > Vertical(V)

Ribbon: Parametric > Dimension > Vertical

Toolbar: /

Command Line: DCVERTICAL

Command Alias: /

Command Prompts:

Specify first constraint point or [Object(O)]: Specifies the first point of the object to be constrained.

Specify second constraint point: Specifies the second point of the object to be constrained.

Operation Steps:

1. Select both ends of the vertical line as shown to add vertical constraints.

2. The vertical distance between the object's endpoints is constrained.
