Floating Drawing Tabs

[GstarCAD 2027](#) · [Whats New](#)

What's new in GstarCAD 2027 > Floating Drawing Tabs

You can drag a drawing file tab away from the application window to create a floating window.

- Multiple drawing files can be displayed simultaneously without the need to switch between tabs.
- You can move one or more drawing files to another monitor, making it convenient to compare drawings or perform copy-paste operations between them.

System Variable

A new [SYSFLOATING](#) system variable has been added to control the fixed state of drawing file tabs.
