LINE Enhancement

[GstarCAD 2027](#) · [Whats New](#)

Innovative Features > LINE Enhancement

ANGLE (A) option is added for line command, with this option you can get a fast way to draw a line without assistance of the polar or a xline. You can directly input the angle value refers to X axis as well as you can take other line as reference to input the angle value and even you can input the angle value directly refers to previous line.

Uses the "Reference" option, you can draw a line parallel to or at an angle to any line in the drawing.

You can draw a line by inputting four different parameters: positive and negative angle and reference angle relative to the previous paragraph (the black line).
