LOCKUP

[GstarCAD 2027](#) · [Whats New](#)

Innovative Features > LOCKUP

Function Description:

Sometimes a designer sends drawings to other people, but doesn't want others to modify the drawings. The Drawing Lock function can turn the drawing into a whole block. The locked entity objects in the drawings can be unlocked by entering a password, and the locked objects cannot be deleted. Other objects that pass through the locked objects can be clipped and edited normally, and the processed drawings can be browsed, printed, but cannot be decomposed or edited. It is a good way to prevent others from modifying the drawing.

Command Access:

Menu: Express > Drawing Tools > Drawing Lock

Ribbon: Express > Drawing > Drawing Lock

Toolbar: /

Command: LOCKUP

Alias: /

Command Prompts: /

Operation steps:

1. Executes the LOCKUP command, the command line will prompt:

Objects will not be able to be modified after using this function, would you like to continue?
[Yes(Y)/No(N)]:

-

Yes (Y): the command line will prompt:

Select object:

Selects all the objects in the current drawing to be locked.

- No (N): Exits the command

2. Selects the object to be locked in the drawing area, press Enter after selection, the command will prompt:

Do you want to create a password? [Yes (Y)/No (N)]:

- Yes (Y): the command line will prompt:

Enter password:

- No (N): Exits the command, the object selected to be locked is locked without password

3. After entering the password, the Enter key command is executed, and the object selected to be locked is locked with the password.
