WIPEOUT Enhancement

[GstarCAD 2027](#) · [Whats New](#)

Innovative Features > WIPEOUT Enhancement

GstarCAD brings you the WIPEOUT command enhanced with more options. Now this command could use a circle object to be wipeout or even you can pick up a closed polyline object containing arcs. For example, you can explode and outline a block definition shape (car) then join it as polyline then wipeout this polyline and group it with the block definition and place it on your drawing as showing below.
