APERTURE System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

The APERTURE system variable is used to set the display size of object snap aperture box by pixels. The name of this system variable is the same as command. Users can also use SETVAR command to access this system variable.

Type	Integer
Saved in	Registry
Initial value	10
Range	1 ~ 50

Users can input a value between 1 and 50. The larger the number, the bigger the aperture box. Users can also change its settings in Option>Draw tab. APERTURE controls the object snap target box, not the pickbox displayed at the Select Objects prompt. The object selection pickbox is controlled by the PICKBOX system variable.
