About Dimension Styles

[GstarCAD 2027](#) · [Command Reference](#)

You can control the appearance of dimensions by modifying dimension styles. These settings in dimension styles can be stored for convenience and to help maintain dimensioning standards.

[Overview of Dimension Styles](#)

The appearance of dimensions is controlled by a dimension style, which is a named collection of dimension settings.

[Control Dimension Geometry](#)

You can control the appearance of dimension lines, extension lines, arrowheads, and center marks.

[Control Dimension Text](#)

You can control the placement of dimension text, arrowheads, and leader lines relative to the dimension and extension lines.

[Control Dimension Values](#)

The numeric values displayed in dimensions can appear in several formats. You can also control how numeric distances are represented.
