

CDATE System Variable — GstarCAD 2027

CDATE System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

The CDATE system variable is used to save current date and time by decimal type of codes.
(Read-Only)

Type	Real
Saved in	Not saved
Initial value	unknown

The date and time is shown by decimal type beginning with the year. After the decimal point, CDATE displays the time using a 24-hour clock.
